Packaging services for all your needs

ILT offers a wide variety of packaging and specialized packaging services to meet any customer's needs. We ensure the accuracy of the product count in our customers' bags by using an automated counting system that fills the correct amount of product per bag. If customers need their bags certified for ultra cleanliness, we can certify the bags using our in-house GC methods. Both standard and custom labeling is available.

In addition to manufacturing, we are pleased to offer our customers the option of having their finished products assembled and packaged in a custom kit designed to their specifications.

If you have a specific packaging need, please contact us.
