

ILT Lined Seals and Snap Caps

Our seals and snap caps outperform the competition

Today's requirements for chromatographic instrumentations are so demanding that existing lined seals can no longer provide the low levels of extractability required by most analytical equipment.

ILT's family of aluminum lined seals and plastic snap caps were developed specifically for the chromatography market using our proprietary inserting process that reduces liner fallout.

Our 11mm seals are designed for use with all 12x32mm crimp top autosampler vials. Our 11mm snap caps are designed for use with all 12x32mm snap ring vials.

11mm crimp cap with crimp-neck vial

Lined seals available in:

- 8mm and 11mm aluminum seals
- Synthetic or natural PTFE/red rubber
- PTFE/silicone
- PTFE/silicone/PTFE
- PTFE
- Butyl
- PTFE/butyl
- Wide range of thicknesses and durometers
- Single pre-slit, cross-slit and starburst liners
- 8mm and 11mm colors: silver, red and green
- 11mm also available in blue and gold

Snap caps available in:

- 11mm plastic snap caps
- PTFE
- PTFE/red rubber
- Red PTFE/white silicone
- Red PTFE/white silicone/red PTFE
- Single pre-slit, cross-slit and starburst liners
- Specialty liner materials
- Stock colors: natural, yellow, green, blue, red and black
