Re: **REACH/RoHS Statement**

With regard to your recent inquiry for REACH and RoHS information, we certify the following for products supplied to you by ILT:

These products meet the requirements of REACH EC 1907/2006. The SVHCs identified in the current candidate list (June, 2022) do not naturally occur in the raw materials for these products nor are they intentionally introduced in the manufacturing process for these items.

With respect to RoHS 2015/863/EU, these products are not electronic components, therefore the standard does not apply. We can certify, however, the restricted materials within the standard (including amendments 2015/863 and 2017/2102/EU) do not naturally occur in the raw materials for these products nor are they intentionally introduced in the manufacturing process for these items.

The above information is based on the best available knowledge from our suppliers of raw materials, as well as our own manufacturing processes. We do not test for the presence of trace amounts of these substances that may be introduced into the products as a contaminant.

This statement is for information only and does not constitute a warranty or product specification.

Please contact me if you have any questions or concerns.
