

PRESS-FIT SECURE™

Patent Pending No.
63/944,917

INTRODUCING ILT'S PRESS-FIT SECURE™

Available in a 9mm screw cap.

FEATURES:

ILT's Centered Seal System guarantees a secure and centered liner every time

For high throughput laboratories that need to minimize sample loss

Low-bleed silicone/PTFE suitable for LCMS and GCMS methods

Sustainable press-fit design allows for separation of components for easy recycling

Utilizing its Center Seal System, ILT's new Press-Fit Secure™ product provides a reliable sealing solution that minimizes sample evaporation even when pre-slit. Available in a 9mm screw cap, this innovative (patent pending No. 63/944,917) design features a liner that fits securely into the top of the cap, reinforcing the seal to minimize sample loss, liner push through and fallout. Its top-facing design ensures clear visibility, allowing users to quickly verify correct orientation for a secure, reliable fit every time.

Part #	Description
009-13-5612	9mm blue screw cap, clear silicone/blue PTFE
009-13-5613	9mm blue screw cap, clear silicone/blue PTFE, pre-slit
009-13-5614	9mm blue screw cap, clear silicone/red PTFE
009-13-5615	9mm blue screw cap, clear silicone/red PTFE, pre-slit
