

ILT'S **SURE-CLEAN™** SNAP DUST COVER CAP FOR ENVIRONMENTAL SAMPLE COLLECTION

FEATURES:

Removable snap top dust cover prevents contamination

Interlocking cap design for a one-piece cap and cover

Direct replacement for two-piece plastic dust cover and cap

Analysis ready - from the field to the lab to analysis with one cap

SURE-Clean™ caps for EPA environment testing offers a new innovative one-piece cap with a removable snap top dust cover, designed to reduce chemical and particulate contamination during sample collection, transportation, and storage.

SURE-Clean™ 24mm caps for EPA VOA vials assures that the samples collected in the field are unaffected by environmental conditions during sample collection and transport back to the lab.

SURE-Clean™ caps are analysis ready - from field --> lab --> analysis with one cap. The fully interlocking snap cap dust cover stays in place until it can be removed for analysis. The 24mm cap is lined with a bonded low-bleed silicone that meets EPA standards.

Part

Description

024-13-7501
