

ULTRA WELD

ILT'S **ULTRA WELD** CAPS FOR CLINICAL DIAGNOSTICS

FEATURES:

Ultrasonically welded liner

Autoclavable

Available with Polypropylene or PTFE layer facing sample

Available in 15mm closed top caps

ILT's Ultra Weld 3-layer liner is ultrasonically welded to the caps surface without the use of adhesives. The 3-layer liner is available with PTFE or Polypropylene facing the sample for use across volatile samples and biological media like serum and blood products. ILT's Ultra Weld caps withstand autoclaving and are compatible with ETO sterilization.

Part

015-15-6192

015-15-6796
