LC CLEAN®

CLEAN - CLEAR - BONDED. EXCELLENT FOR MASS SPECTROMETRY LAB USE.

ILT's **LC Clean®** product not only meets today's requirements for LC, HPLC and LCMS but exceeds them. **LC Clean®** is manufactured using a color free ultra clean silicone material faced with a clear PTFE film.

FEATURES:

Highest level grade silicone.

Color-free ultra high grade PTFE.

Test methods developed with instrument manufacturers.

Assured cleanliness for use in Pharmaceutical laboratories.

Our products undergo HPLC and LCMS testing using exclusive test methods and protocols developed in cooperation with leading chromatographers and scientists. Testing and certification begins with the raw material and continues throughout the manufacturing process. A test certificate is issued and the actual chromatogram provided to our customers for all caps manufactured to verify that the high level of cleanliness is maintained throughout process.
