

PHARMAFIX II SEPTA

DESIGNED FOR ALL HEADSPACE APPLICATIONS.

Introducing the new and innovative **ILT Pharma-Fix II™ septa**, designed for all headspace applications.

FEATURES:

Full PTFE facing across the entire septa.

Liners are manufactured from low extractable materials.

Available in 13mm and 20mm.

Ultra seal formed with glass vial rim using unique molded design.

Synthetic elastomer never contacts sample.

The Pharma-Fix II septa combines the tried and true design of the original Pharma-Fix septa and makes it better, by offering a full PTFE coating over the face of the septa - even in the grooves. The PTFE is molded into the septa during manufacturing, thus eliminating a spray technique and provides a complete PTFE layer.

Part #	Description
013-03-6001	13mm Pharma Fix II, standard crimp cap, dark gray silicone with complete PTFE face
020-03-6002	20mm Pharma Fix II, standard crimp cap, dark gray liner with complete PTFE face
