

20MM PTFE/BUTYL STOPPER

INTRODUCING THE NEW ILT 20MM BUTYL/PTFE STOPPER FOR LABORATORY USE.

ILT's technology in manufacturing capability allows for the PTFE film to surround only the plug of the stopper. This provides a secure fit into the cap while still providing the PTFE film inert face to the sample.

FEATURES:

20mm Dark Grey Butyl/PTFE stopper.

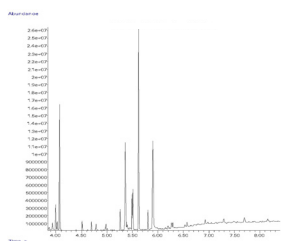

Ideal laboratory use for sample storage or chromatography applications.

Secure fit into any crimp cap.

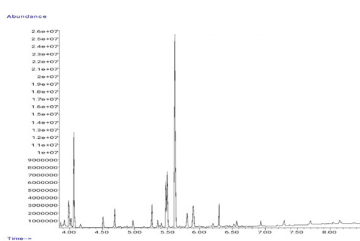

PTFE film covers the plug up to flange edge.

PTFE film provides increased chemical resistance and reduces leachable compounds.
